

APLOS 5-STAGE

Pumped/Non-Pumped Reverse Osmosis Drinking Water System [50GPD]

The APLOS Standard series offers a classic, reliable design for under-sink reverse osmosis drinking water systems. Each system comes with a complete installation kit and colour-coded tubes for easy setup. Not only are these systems cost-effective, but they're also highly efficient, removing 99.8% of water contaminants.

Using trusted reverse osmosis (RO) technology, they provide you with fresh, pure water 24/7, delivering quality that exceeds bottled water, directly from your kitchen tap.

For homes with an inlet pressure below 3 bar, we recommend the APLOS pumped RO system, which ensures the effective removal of 99.8% of contaminants.

5 STAGE FILTRATION

• APLOS PUMPED

Model	Stock Code
Aplos - 5-Stage non-pumped RO unit 50GPD	3205600
Aplos - 5-Stage pumped RO unit 50GPD	3205630

Model	Stock Code
Aplos - 3 Pack filter set 1-2-3	3205610
Aplos - 2 Pack filter set 4-5	3205620

Model (Non-Pumped): RO-N5050

Model (Pumped): RO-5050

Filtration Stages: 5

Max Daily Production Rate: 50 GPD | 227.30 LPD | 0.227 m³

Flow Rate (Pumped): (Pumped) 9.47 LPH or 227.28 LPM

Inlet Pressure: 3-6 Bar

Feed Water: Municipal tap water or pretreated well water

Gross Weight (Non-Pumped) / (Pumped): 8.8kg / 11.8kg

Box Size (mm) (H)x(W)x(D): 580 x 290 x 460
